

CERAMICAH

Care Instructions

Our signature Tera Lamps are hand made and come in a variety of finishes that require gentle care. Please reference the instructions below for how to maintain your Ceramicah piece.

Transportation

As both the shade and base are made of ceramic, they can be fragile and should be transported separately. Unscrew brass topper to remove shade, wrap both base and shade thoroughly in bubble wrap or protective packing material to transport. Gloves are advised when handling the lamp to avoid fingerprints and marks.

Unglazed Finishes

To avoid marks and dirt rubbing off on the lamp, only handle with gloves. If the lamp does get marked, use hot water and a brush to clean, dry with a cloth or let air dry. Use a compressed air duster to remove dust. Avoid using fibrous cloths when cleaning as the fibers can catch on the uneven surface.

Glazed & Plaster Finishes

Although these finishes are sealed and water resistant, we also recommend handling with gloves to avoid marks. If dirty, carefully clean with warm soapy water and microfiber cloth. If mark persists, use a small dab of Brasso on a cloth and rub carefully. Use a compressed air duster or a dry microfiber cloth to remove dust.
